EDUCATION

Gurugram University - Gurugram, Haryana, India | **2023 - Present**
B.Tech in Computer Science and Engineering, CGPA: 7.5

SBS School, Karnal - Karnal, Haryana, India | **2022 - 2023**
Class 12th - Science, 91%

WORK EXPERIENCE

SkillZen Community - Remote | **February 2026 - Present**
Tech Team Member & Head of Content Writing

- Built several pages and features for the SkillZen website.
- Collaborated with teammates on development projects and community initiatives.
- Led the Content Writing Team, coordinating and reviewing content creation.

Decor Joy Gurgaon - Gurugram, Haryana, India
Frontend Developer

- Developed a production-ready, mobile-first React 19 and Vite frontend for a Gurugram event decoration business.
- Created 9 pages, including a multi-step inquiry form, searchable catalog, and filterable gallery, using React Router.
- Managed server state with TanStack Query and Axios, using caching and background updates.
- Added a wishlist, WhatsApp contact integration, toast notifications, and error monitoring.
- Enabled server-side rendering and per-page meta tags to improve search engine optimization.

PROJECTS

Legal AI
GitHub: github.com/ansh2028

- Engineered a full-stack AI legal assistant using React, Node.js, Express.js, and MongoDB to explain Indian legal procedures.
- Integrated Google Gemini with real-time streaming for First Information Report interpretation, bail eligibility, and rights analysis.
- Implemented PDF upload and analysis of court notices and legal documents.
- Secured the platform with JSON Web Token authentication, password hashing, and protected API routes.

AI Resume and Interview Prep Tool
GitHub: github.com/ansh2028

- Designed a full-stack AI tool using React 19, Node.js, Express.js, and MongoDB with secure cookie-based authentication.
- Generated match scores, interview questions and answers, skill gap analysis, and preparation roadmaps with Google Gemini.
- Produced ATS-optimized resumes as downloadable A4 PDF files using a headless browser.
- Introduced automatic model fallback and session invalidation on logout.

CricAI
GitHub: github.com/ansh2028

- Delivered an AI-powered cricket analysis platform using the MERN stack.
- Established a responsive React interface and REST APIs with Node.js and Express.js.
- Applied Artificial Intelligence and large language model workflows to transform cricket queries and data.
- Strengthened expertise in API architecture and asynchronous programming.
