

ANSH BHOLA

Computer Science Student | Aspiring Software Developer

Gurugram, Haryana | anshbhola10s@gmail.com | +91 95885 52012 | github.com/ansh2028

PROFESSIONAL SUMMARY

Computer Science student at Gurugram University with a strong foundation in full-stack web development and database concepts. Proficient in JavaScript, React, Node.js, and SQL, with hands-on experience delivering practical applications. Quick learner with a problem-solving mindset, seeking an internship to apply technical skills and gain real-world development experience.

TECHNICAL SKILLS

JavaScript	React	Node.js	SQL	HTML / CSS
Python	Pandas	Git	REST APIs	DOM / Browser APIs

EDUCATION

Bachelor of Technology — Computer Science & Engineering

Gurugram University, Gurugram, Haryana

2023 – Present

Class 12th (CBSE)

SBS Sr. Sec. School, Karnal | 92%

2022

PROJECTS

PDF Merging Application

[JavaScript](#) · [Node.js](#) · [HTML/CSS](#)

- Built a full-stack web application that allows users to upload and merge multiple PDF files into a single document
- Implemented server-side file handling with efficient memory management for large file uploads
- Designed a clean drag-and-drop UI with real-time feedback for a smooth user experience
- Optimized processing pipeline to handle concurrent uploads without performance degradation

Personal Expense Tracker

[React](#) · [Node.js](#) · [SQL](#) · [Chart.js](#)

- Developed a full-stack expense tracking application with user authentication and persistent data storage
- Built a RESTful API with Node.js/Express and a normalized SQL schema to store transactions by category and date
- Integrated Chart.js to render interactive monthly spending breakdowns and trend visualizations
- Implemented filtering, search, and CSV export functionality for comprehensive financial reporting

To-Do List Web Application

[JavaScript](#) · [HTML](#) · [CSS](#) · [LocalStorage](#)

- Built an interactive task management app with add, edit, delete, and completion-toggle functionality
- Used localStorage for persistent task retention across browser sessions without a backend
- Applied dynamic DOM manipulation for instant UI updates without page reloads
- Designed a fully responsive interface optimized for both desktop and mobile viewports

CricAI – Cricket Training App

[Concept](#) · [UI/UX](#) · [AI Research](#)

- Designed a concept-based mobile application aimed at helping players improve cricket skills through AI-driven insights
- Planned core features including performance tracking, personalized drill recommendations, and match analytics
- Researched AI/ML integration strategies for real-time feedback on batting and bowling techniques
- Created detailed user flow diagrams and wireframes focused on intuitive navigation for players of all skill levels
- Structured a scalable architecture plan to support future backend integration and multi-sport expansion
